REQUIRED MATERIALS

The following format only: PDF/X1a
Native application files not accepted.
Follow SWOP specifications for material and proofing.
Total dot density of 300, plus three SWOP color proofs with color bars (i.e., Iris or Kodak approvals).
SWOP specifications guidelines are available at <http://www.swop.org/index.asp>

WHAT IS PDF/X-1A?

PDF/X-1a is a subset of Adobe's Portable Document Format (PDF). PDF/X1a stands for PDF eXchange 1a. The "1" means that it is a blind exchange document—all fonts and images are embedded and "a" is the variant of PDF/X1 that was ISO accredited; ISO Standard: ISO 15930-1:2001.

PDF/X1A MUST MEET THE FOLLOWING SPECIFICATIONS:

All fonts and images are embedded.
All elements are encoded as CMYK, spot for Device N.
They may not be encoded as three-art color spaces such as RGB or CIELab.
The MediaBox and TrimBox or ArtBox are defined.
Trap must be indicated as on or off, alerting the printer to the condition of the document.
The printing condition characterized (such as SWOP) through use of an output condition identifier.
PDF/X1a resolves many issues associated with basic PDF as a format for file exchange.
