GRUMPY

asennevamma

Basic character set; 13/20 points with +100 tracking:

[illegible]

Grumpy is loosely based on **ITC Grouch** by Herb Lubalin. Design is slightly heavier than Grouch, and many glyphs differ notably from Grouch. It is a display typeface with very tight tracking, and more than 2000 kerning pairs for overall even colour.

Letterspacing method is TNT (that is Tight, Not Touching); a very popular type treatment int the seventies and eighties.

Grumpy has some stylistic alternate glyphs, for example # goes №, & goes & and 7 goes 7.
