Typography (from Greek τύπος, “to strike”, and γράφω, “to write”) is the art and technique of arranging type, type design, and modifying type glyphs. Type glyphs are created and modified using a variety of illustration techniques. The arrangement of type involves the selection of typefaces, point size, line length, leading (line spacing), adjusting the spaces between groups of letters (tracking) and adjusting the space between pairs of letters (kerning).

Typography is performed by typesetters, composi-

tors, typographers, graphic designers, art directors, comic book artists, and clerical workers. Digitising opened up typography to new generations of visual designers and lay users.

Typography traces its origins to the first punches and dies used to make seals and currency in ancient times. The first known movable type printing artefact is probably the Phaistos Disc, though its real purpose remains disputed. The item dates between 1850 BC and 1600 BC, back to Minoan age and is

now on display at the archaeological museum of Heraklion in Crete, Greece.

Typography with movable type was separately invented in 11th-century China. Modular metal type was first invented in Korea during the Goryeo Dynasty around 1230. It was independently developed in mid-15th century Europe with the development of specialised techniques for casting and combining cheap copies of letterpunches in the vast quantities required to print multiple copies. ■ **Ethos 10/12**

GRJKQagk£

SIMPLICITY. Clean and simple letterforms, no remnants of antiqua shapes.

ABEFHMRS

NEUTRAL PROPORTIONS. Loosely based on the proportions of transitional typefaces.

0123456789

TALL NUMERALS. Figures have full height, but are lighter than the capitals. The forms are slightly condensed, the diagonals straight.

MN47

HEAVY DIAGONALS. Most diagonals carry more weight than usual. Subtle incisions and slight thinning of vertical stems are used to balance the overall weight distribution and reduce strain on tight corners.

¥ ∞ ħ

SOFT CORNERS. All glyphs have very slightly rounded corners, in imitation of the effects of the traditional letterpress process. At text sizes, this is perceivable only as a subtle hint of smoothness on the page.

Ελληνικό αλφάβητο

ETHOS REGULAR ■ COMPARISON WITH SIMILAR GROTESQUES

ETHOS 8.5/11

It is something of an understatement to say that typographer Jan Tschichold was confident of his own importance. On the occasion of his 70th birthday in 1972, he wrote his own tribute in the third person. It began: "Two men stand out as the most powerful influences on 20th-century typography: Stanley Morison, who died in 1967, and Jan Tschichold."

Morison, begetter of the Times typeface amongst many others, is now largely hidden in history. Tschichold, however, has recently come to fresh prominence. An avant-garde German typographer in the 1920s, Tschichold is most remembered in Britain for his postwar refashioning of Penguin paperbacks, with their famous, horizontally banded covers – orange for fiction, green for crime, blue for biography. Celebrations of the publisher's 60th anniversary in 2005 helped bring him out of the circle of professional and academic admirers to a much wider audience. Since then three books have appeared, and now comes a coffee-table tome from Thames & Hudson.

Tschichold was born in 1902. The son of a signwriter, his first career was as a calligrapher for advertisements. His home town of Leipzig was the centre of the German book trade, and the young Jan was naturally drawn into the world of print. But he'd also heard about the new "-isms" in art, and was curious. Constructivism was on view not far away in Weimar, when the Bauhaus opened its doors for a public exhibition in 1923. Founded by the architect Walter Gropius as a school of arts and crafts in 1919, Bauhaus staff included well-known artists such as Paul Klee and Wassily Kandinsky. Abstract art of the kind imported from Mondrian and the Dutch De Stijl movement, and in particular the ideas of the Russian Constructivists, influenced Gropius to expand the aims of the Bauhaus.
