

QalamBartar Dynamic Arabic Fonts

Dropping dots + marks, Arabic has 1+18 basic forms: One joins none, 4 join (@+13) coming before them. @ flowers and 13 shrink tails to appropriately join the 18 coming after them. At word-ends, 2 of the 13 curve tails counterclockwise, 10 clockwise + M either way

ر	و	د	ا	ء	ه	end	ع	ح	ط	ف	ب	ك	م	ل	ق	س	ص	ي	ن
ر	و	د	ا	ء	ه	join	ع	ح	ط	ف	ب	ك	م	ل	ق	س	ص	ي	ن
4 join right					1	@	Unlike ccw + this, 10 (these 3, M + these 7) are swashable.												

=

See how Kaf + @

1. Line to H, Jeem + Waw
2. Curve Up to Alif + Dal
3. Curve down to Ra
4. Atop Yeh, H, Jeem + Meem

کجا کھا ہو کو
 ها کا هد کد هر کر
 هي کي هم کم هھا هھا

Windows + MAC are compelled to Fly high Arabic by QalamBartar (QB), a tool built by MaryamSoft.com that works even with M\$ Wordpad @ MacTextEdit. With its dynamic unique fonts, QB is a must-have for schools, (e)publishers + graphic designers.

Learn by doing:

Run QB + Wordpad or TextEdit. Choose a font beginning with (w_ or wm_), and go on typing, keeping an eye on the auto (dis)appearing Selector. Key [Windows]+[\] or [Mac]+[\] to hide/show 2 panels: DMG and Control Panels:

DMG: Dot/Mark Gun

Control Panel (CP)

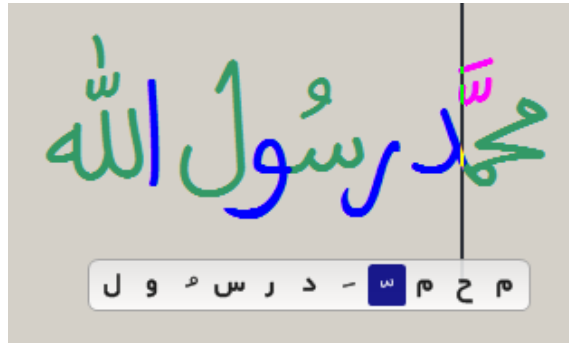

(.) Target Letters

(.) Target Dots + Marks

■ Undo Changes

↔ Normal/Swordy

↻ Cycle thru Alternatives

By means of DMG, Dots + marks can be easily shot Above + Below letters.

By means of the Control Panel and with help of the Selector, it is easy to:

1. Target any letter, and hit Arrow or Key [Alt]+[Arrow] to move it up,down, across or back.

کتاب کتاب دوریان دوریا

2. Target one of the 10 swashable letters, hit ↔ or Key [Alt]+[Space], then Overlap the following word across it. Swashing + Overlapping saves space and beautifies phrases.

چردیق جاوی. فرض عین

3. Target Meem, H, @, or Kaf and hit  or key [Alt]+[H] to cycle through Alternatives.

السلام عليكم وعليكم أهلاً وسهلاً سهلاً

4. Target M, @ or H and hit  or key [Alt]+[H] to get the Green Sheltered/Shouldered in self-explanatory combinations that saves space + beautifies phrases.

مسجد. محمد. محمد. محمكة. شهيد. هجري. شمسي
مسجد. محمد. محمد. محمكة. شهيد. هجري. شمسي

5. Target a dotted letter and split its dot(s) by keying [Ctrl]+[Alt]+[Arrow]. Then,

- Remove the moved dot(s) by hitting [Delete] or [Backspace] , or
- Color and size the separated dot(s) by changing the font attribute, and/or
- Turn the horizontal pair of dots (..) to vertical (:) by hitting , or keying [Alt]+[H].
- Accurately position the separated dot(s) by holding [Ctrl] + [Alt] + hitting Arrow keys.

حروف عربية حروف عربية

6. Target any mark, then

السَّلامُ عَلَيْكُمْ أَهْلاً وَسَهْلاً

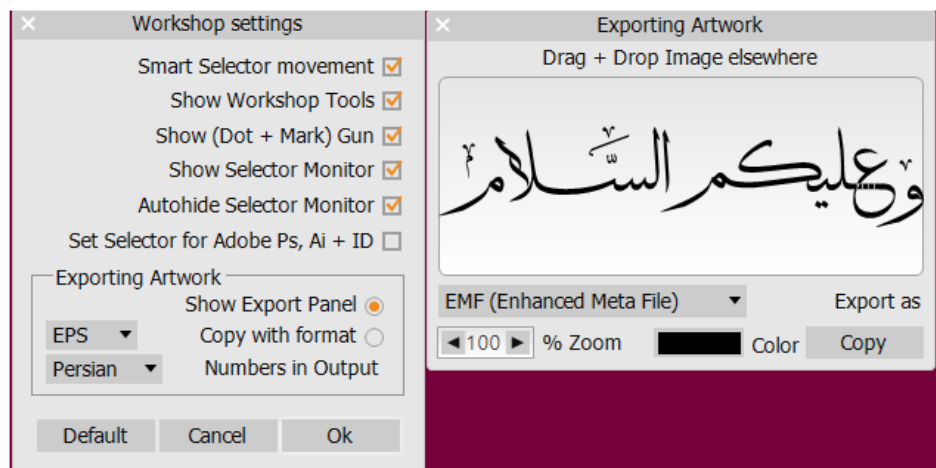

- Accurately position it by holding [Ctrl] + [Alt] + hitting Arrow Keys.
 - Color and size it by changing the font attributes.
 - Cycle through alternative mark by hitting , or keying [Alt]+[H].
 - Slant, elongate or shorten Fatha (/) + (//) by hitting , or keying [Alt]+[Space].
- P/S. By default, wide Fatha (/) + (//) are set above wide letters.

7. Add variety of Marks and Kashidas to simulate Arabic calligraphy.

وعليكم السلام

8. Export Artwork!

- Asis to InDesign or Office applications simply by copy + paste.
- As eps, emf, png or bmp image by pressing [Alt]+[C] and choosing type, color and size

- As crisp, clean and scalable vector (svg) simply by dragging and dropping the captured image into the target application such as Freehand, Illustrator, PhotoShop or CorelDraw.

9. Target the Lam before Alif and hit  or key [Alt]+[H] to get Alif+Lam combination.

من المسجد الحرام (المسجد الأقصى) الأقصى

10. Select a phrase and undo changes by hitting  or pressing [Alt]+[Delete] .

Word + Inword Spacings

R+Z create gaps within words. These gaps vary in width with the variation of the following letters, causing unpleasant irregularities. QB automatically harmonizes such gaps, and repositions the surrounding dots, if any + necessary. Which word is easier to read?

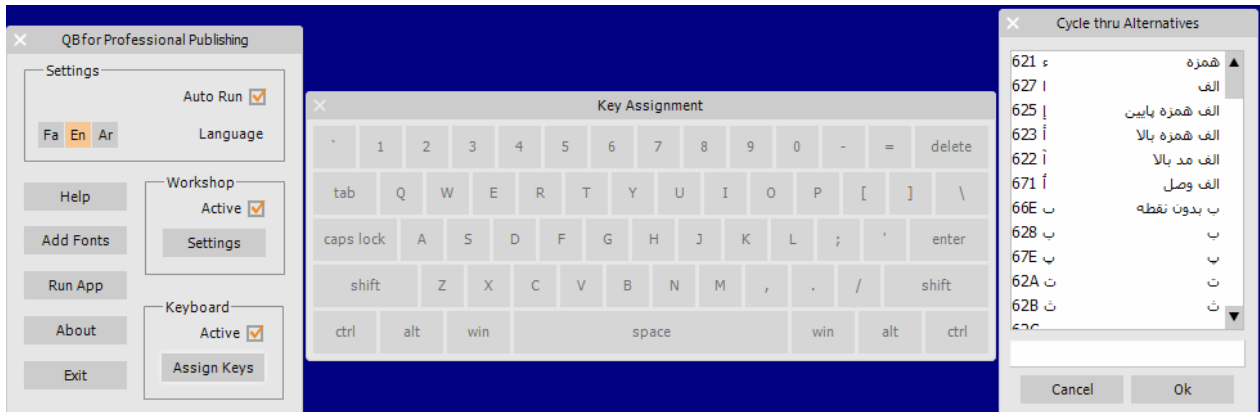

دندا بیدغ برشکور شریکت
دندا بیدغ برشکور شریکت

بوروغ ساویت بلاکغ قلاجرن
بوروغ ساویت بلاکغ قلاجرن

Word-spaces: Arabic can go without spaces; one would simply understand where a word ends and the next one starts; i.e. most letters reflect their positions. As space is inevitable in the world of publishing, and evenly spaced Arabic is impossible, it is recommended to find and replace all the spaces after R+Z with half spaces.

Programmable Keyboard

Assign your own keys according to your need so that the higher the glyph frequency, the more accessible the key is made.
